

Dingle Bank Quarry, Near Sandbach, Cheshire

- An existing silica sand and building sand quarry that has been operational now for approximately 50 years
- The quarry is coming towards the end of its life (anticipated about 2011)
- A mineral lease and associated documentation govern the relationship between the owners of the land and the operators, WBB Minerals Limited
- Hawksmoor act as the retained mineral agents for the owners of the quarry
- Hawksmoor arrange site meetings to review progress on a quarterly basis and check royalty returns by cross referencing the assured surveys of the quarry
- Hawksmoor periodically provide reports and valuations for the landowners for tax purposes

Testimonial

"Hawksmoor have acted as mineral agent for the Executors of Joan Crosby (deceased) at the Dingle Bank Quarry site since early 2004. They have provided a strong, reliable service in terms of ensuring that the operator complies with the terms of the mineral lease and in terms of providing reports and valuations to the Executors as required. I have no hesitation in recommending Hawksmoor to any other prospective clients".

N Shaw - Executor
